

Employee Management LWC in Salesforce (Without VS Code)

We will do everything directly inside Salesforce.

You will create:

- Custom Object (Database)
- Validation Rules
- Lightning Web Component
- Save Employee Records

No VS Code needed.

PART 1 — Login to Salesforce

Go to:

[Salesforce Login](#)

Login with your developer account.

PART 2 — Create Employee Object (Database)

Step 1: Open Setup

Click:

⚙ Gear Icon

→ Setup

Step 2: Open Object Manager

Search:

Object Manager

Click it.

Step 3: Create Custom Object

Click:

Create

→ Custom Object

Fill:

Field	Value
Label	Employee
Plural Label	Employees
Record Name	Employee Name

Click:

Save

PART 3 — Create Fields

Inside Employee Object:

Fields & Relationships

→ New

Create these fields one by one.

1. Employee ID

Property	Value
Data Type	Number
Label	Employee_ID
Length	10

IMPORTANT:

Check:

Unique

Save.

2. Salary

Property Value

Data Type Currency

Label Salary

Save.

3. Email

Property Value

Data Type Email

Label Email

Save.

4. Department

Choose:

Picklist

Values:

HR

IT

Finance

Marketing

Sales

Save.

5. Joining Date

Property Value

Data Type Date

Label Joining_Date

Save.

PART 4 — Create Validation Rules

Validation rules automatically check conditions before saving.

Validation 1 — Employee Name

Inside Employee Object:

Validation Rules

→ New

Rule Name:

NameValidation

Formula:

LEN(Name) < 3

Error Message:

Employee name must contain at least 3 characters

Save.

Validation 2 — Employee ID > 0

Create another rule.

Rule Name:

EmployeeIdValidation

Formula:

Employee_ID__c <= 0

Error Message:

Employee ID must be greater than 0

Save.

Validation 3 — Salary Range

Rule Name:

SalaryValidation

Formula:

```
OR(  
Salary__c < 10000,  
Salary__c > 500000  
)
```

Error Message:

Salary must be between 10000 and 500000

Save.

Validation 4 — Department Required

Rule Name:

DepartmentValidation

Formula:

```
ISBLANK(TEXT(Department__c))
```

Error Message:

Please select department

Save.

Validation 5 — Future Joining Date

Rule Name:

JoiningDateValidation

Formula:

```
Joining_Date__c > TODAY()
```

Error Message:

Joining date cannot be future date

Save.

Correct Method

Step 1 — Open Lightning App Builder

Go to:

Setup

→ **Lightning App Builder**

→ New

Choose:

Record Page

NOT App Page.

Click Next.

Step 2 — Select Object

Choose:

Employee

Click Next → Finish.

Step 3 — Find Component

Now in left panel search:

Record Detail

OR

Highlights Panel

OR

Field Section

Most commonly you will get:

Record Detail

Drag it to center.

Step 4 — Save and Activate

Click:

Save

→ Activate

→ Org Default

Step 5 — Open Employee Tab

Now go to:

App Launcher

→ Employee

Click:

New

Now Salesforce automatically shows form fields.

Your validation rules will work automatically

App Launcher => Sales => More => Employees => New

College Management Lightning Application in Salesforce

We will create:

TWO SEPARATE OBJECTS

1. Student Object
2. Faculty Object

TWO SEPARATE APPS

1. Student App
2. Faculty App

Everything inside Salesforce only.

PART 1 — CREATE STUDENT OBJECT

Step 1 — Open Object Manager

Go to:

Setup

→ Object Manager

→ Create

→ Custom Object

Step 2 — Create Student Object

Field	Value
Label	Student
Plural Label	Students
Record Name	Student Name

Click:

Save

PART 2 — CREATE STUDENT FIELDS

Go to:

Student Object

→ Fields & Relationships

→ New

Create these fields.

1. Roll Number

Property Value

Type Number

Label Roll_Number

Check:

Unique

Save.

2. Marks

Property Value

Type Number

Label Marks

Save.

3. Email

Property Value

Type Email

Label Email

Save.

PART 3 — STUDENT VALIDATION RULES

Go to:

Validation Rules

→ New

Validation 1 — Marks

Rule Name:

MarksValidation

Formula:

OR(
Marks__c < 0,
Marks__c > 100
)

Error Message:

Marks should be between 0 and 100

Save.

Validation 2 — Roll Number

Rule Name:

RollValidation

Formula:

Roll_Number__c <= 0

Error Message:

Roll number must be greater than 0

Save.

Validation 3 — Student Name

Rule Name:

StudentNameValidation

Formula:

ISBLANK(Name)

Error Message:

Student name cannot be blank

Save.

Email Validation

Salesforce Email datatype automatically validates:

@

So no separate rule needed.

PART 4 — CREATE STUDENT TAB

Go to:

Setup

→ Tabs

→ New

Choose:

Student

Select tab style.

Save.

PART 5 — CREATE STUDENT APP

Go to:

Setup

→ App Manager

→ New Lightning App

Student App Details

Field	Value
--------------	--------------

App Name	Student App
----------	-------------

Next → Next.

Add Navigation Items

Add:

Students

Finish.

PART 6 — CREATE FACULTY OBJECT

Go to:

Object Manager

→ Create

→ Custom Object

Faculty Object Details

Field	Value
Label	Faculty
Plural Label	Faculties
Record Name	Faculty Name
Save.	

PART 7 — CREATE FACULTY FIELDS

Go to:

Faculty Object

→ Fields & Relationships

→ New

Create fields.

1. Faculty ID

Property Value

Type	Number
Label	Faculty_ID

Check:

Unique

Save.

2. Salary

Property Value

Type Currency

Label Salary

Save.

3. Department

Choose:

Picklist

Values:

Computer

Mechanical

Civil

Electrical

ENTC

Save.

4. Joining Date

Property Value

Type Date

Label Joining_Date

Save.

PART 8 — FACULTY VALIDATION RULES

Go to:

Validation Rules

→ New

Validation 1 — Faculty Name

Rule Name:

FacultyNameValidation

Formula:

$\text{LEN}(\text{Name}) < 3$

Error Message:

Faculty name must contain at least 3 characters

Save.

Validation 2 — Faculty ID

Rule Name:

FacultyIdValidation

Formula:

$\text{Faculty_ID_c} \leq 0$

Error Message:

Faculty ID must be greater than 0

Save.

Validation 3 — Salary

Rule Name:

SalaryValidation

Formula:

```
OR(  
Salary__c < 10000,  
Salary__c > 500000  
)
```

Error Message:

Salary must be between 10000 and 500000

Save.

Validation 4 — Department

Rule Name:

DepartmentValidation

Formula:

```
ISBLANK(TEXT(Department__c))
```

Error Message:

Select Department

Save.

Validation 5 — Joining Date

Rule Name:

JoiningDateValidation

Formula:

```
Joining_Date__c > TODAY()
```

Error Message:

Joining Date cannot be future date

Save.

PART 9 — CREATE FACULTY TAB

Go to:

Setup

→ Tabs

→ New

Choose:

Faculty

Save.

PART 10 — CREATE FACULTY APP

Go to:

Setup

→ App Manager

→ New Lightning App

Faculty App Details

Field	Value
--------------	--------------

App Name	Faculty App
----------	-------------

Next.

Add navigation item:

Faculties

Finish.
